The Journey of a Water Drop 💧

Have you ever wondered where your water comes from? Before it reaches your home, water travels a long way through rivers, lakes, and big pipes. It is a precious gift from Mother Earth! But there is a problem: not all the water on our planet is safe to drink. That is why we must be **Water Guardians**.

You can help by taking short showers and making sure no faucets are leaking. Remember, every small action counts. When we protect our water, we protect the fish in the ocean, the birds in the sky, and our own future. Let's keep our water clean and safe for everyone!

Reading Comprehension:

- . Where does water travel before it reaches your home?.....
- . What is a "Water Guardian"?.....
- . Name one way you can help save water at home.....
