

Happy Earth, Clean Earth! 🌍

The Earth is our big, beautiful home. Just like we clean our room, we must keep our planet clean too! When you have a candy wrapper or an empty bottle, look for a trash can. Never throw trash on the street, in the woods, or at the beach.

If we throw trash in the water, the fish get sad. If we leave it in the forest, the trees get sick. But when you put trash in its place, you are a **Planet Protector!** Let's keep the grass green and the water blue. A clean world is a happy world for everyone!

Comprehension mini quiz:

- . Where should you put your trash?.....
- . What happens to the fish if we throw trash in the water?.....
- . What is a "Planet Protector"?.....
