Don't Let the Trash Travel!

Did you know that trash is a great traveler? If you drop a plastic bag on the street, the wind can blow it into a river. From there, it travels all the way to the ocean, where it can hurt turtles and whales. The forest, the beach, and the parks are not trash cans. They are homes for plants and animals!

To be a **Earth Guardian**, you must always put your litter in the correct bin. If you are hiking in the woods or playing at the beach and you can't find a bin, keep your trash in your pocket until you get home. When we stop littering, we keep the soil healthy and the water clear. Remember, a clean planet starts with you!

Reading Comprehension Questions:

- . How does trash from the street get to the ocean?.....
- . Why should we keep our trash in our pockets if there is no bin?.....
- . What does an "Earth Guardian" do?.....
